Who are Bosch?

"I have always acted according to the principle that it is better to lose money than trust. The integrity of my promises, the belief in the value of my products and in my word of honour have always had a higher priority to me than a transitory profit."

Robert Bosch, 1921

For over 130 years, the Bosch name has been synonymous with engineering excellence. Our home appliances are renowned for their quality, reliability and performance which derives from our inherent, unflagging commitment and the painstaking thoroughness with which every unit is made. As you would expect from Bosch, there are no gimmicks or frills with our products - just pure, clean lines and beautiful, functional simplicity that will enhance any kitchen.

The values that shaped Robert Bosch's vision for his new company in 1886 are the same principles that guide the business today; never lose the trust of your customers, look after your staff and partners and change things for the better. It's what has kept Bosch at the forefront of the home appliance industry and what will keep it there in the future.

The new Energy Label: Valid from 1st March, 2021.

Technological development over the past few years has resulted in a higher concentration of products that carry labels with a value of A+ or better. Consequently, the label has not been fulfilling its original function as an aid for making purchasing decisions as well as it formerly did. Other basic conditions like user behaviour have also changed. That's why it's time to adapt the existing energy label. The first home appliances to have the new label will be washing machines, washer-dryers, dishwashers, cooling appliances and wine coolers. As of 1st March, 2021, these appliances must show the new label when sold in shops, online, etc.

The most significant change in the new energy labels is the elimination of the energy efficiency plus classes like, for example A+++. Classification will be from A to G. New methods will also be used for measuring energy consumption and determining the label class. According to EU specifications, they should, to the extent possible, take into account the real-life usage of the product and reflect the average consumer behaviour. This means, for example, that energy consumption for washing machines, washer-dryers and dishwashers will no longer be specified per year but per 100 operating cycles of the particular appliance.

The duration of the label programme to be tested will also be specified for these products. In the case of washing machines and washer-dryers, there will even be a maximum programme duration that must not be exceeded

The test programme for labelling washing machines and washer-dryers is also changing. The new "Eco 40-60" programme will be displayed on the appliance panel. In addition, these devices have now an even higher requirement for their washing performance, as well as a minimum requirement for their rinsing effect. For dishwashers, the composition of the standard place setting will also be changed. For these and other reasons, it is not possible to directly convert the current efficiency classes to the new classes. In addition, you will also be able to retrieve further product information directly via a QR code that is displayed on the energy label. The QR code forwards you to a database operated by the EU from 1.3.2021. This is where you can view and download data sheets for all appliances that require the new energy label. Access to the database is also possible via the Internet. For more information on the new energy label, visit: **www.bosch-home.com**

Lookout for the new energy efficiency class icons throughout our brochure and on our product pages.

ENERG 65 kWh

Sample energy label for dishwashers:

The energy efficiency class for dishwashers continues to be based on the "Eco" programme. However, the test standard has been changed. For example, coffee cups, stainless-steel pots, and plastic utensils will be used to determine cleaning and drying performance to better reflect actual usage behaviour. What's new is the specification of the duration of the Eco programme. This programme is especially eco-friendly, is ideal for normally soiled dishes and is the most efficient programme in terms of "energy and water consumption". However, for resource-saving cleaning (with less consumption of electricity, water and detergent), you have to give these components a certain amount of time to develop their full effect. As with washing machines and washerdryers, energy consumption will be based on 100 cleaning cycles.

Key

- 1 QR code
- 2 Energy efficiency class
- 3 Energy consumption in kWh/100 operating cycles (in Eco programme)
- 4 Number of standard place settings for the Eco programme
- **5** Water consumption in litres/operating cycle (in Eco programme)
- 6 Duration of the "Eco" programme
- Noise emissions expressed in dB(A) re 1 PW and noise emission class

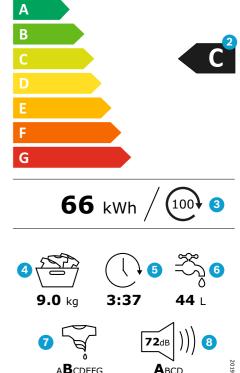

Sample energy label for washing machines:

One of the major changes in the energy label for washing machines is the change in the test programme to which all label values refer. Like, for example, the energy consumption which will be based on 100 wash cycles. The new "Eco 40-60"* programme is suitable for cleaning normally soiled fabrics made of cotton, linen or mixed fibres which, based on their care symbol, are washable at 40°C or 60°C. The fabrics named may be combined in this wash cycle. The "Eco 40-60" programme is the most efficient programme in the combination "energy and water consumption".

Key

- 1 QR code
- 2 Energy efficiency class**
- 3 Weighted energy consumption** in kWh/100 operating cycles (in Eco 40-60 programme)
- 4 Maximum load capacity

- Spin efficiency class**
- 8 Noise emissions during spin cycle expressed in dB(A) re 1 PW and noise emission class** Values apply to quarter, half and full loads

^{*} Eco 40-60 In order to achieve optimal energy efficiency, an optimal washing temperature is defined for this programme. This temperature can't be changed by the customer. The actual washing temperature is specified in the user manual and, depending on the load size, may deviate from the selected washing temperature for reasons of saving energy. Washing performance complies with legal requirements **Values apply to quarter, half and full loads.

Why not try the app?

Experience it yourself: download the free Home Connect app and try Home Connect, even if you don't have an appliance.

amazon alexa

Voice control services based on Amazon Alexa will allow you to connect and control your appliances in your home simply by speaking to Alexa. Along with the ability to use Alexa with many other partners from Philips Hue and IFTTT, the possibilities are endless.

Once Home Connect devices are set up you can control your oven, dishwasher, coffee machine, washing machine and tumble dryer. All you'll need to do is simply ask:

Alexa will then continue to guide you through. Search for Home Connect in the Skills area of the Alexa app.

Google Assistant

With the Google Assistant, users can get the best out of Google and connected home appliances with Home Connect. Just say, "Hey Google" to get started. You can check to see if you need more milk from the supermarket and even stay notified on the go with compatible wearable devices.

Simply control your kitchen appliances with voice control, from your dishwasher and washing machine to your hood and oven.

You'll be able to turn the appliances on and off, but also query Google Assistant about when the appliance will be done and what programme is running.

Helpful Home Appliances

The future has arrived and it's knocking on your front door. Home Connect brings smart technology to your appliances and lets you control them with your phone or tablet.

So, whether you want to turn the oven on to cook your dinner when you're on your way home, or check what's in your fridge while you're at the shops, you'll be in complete control.

Simple to set up, simple to use.

There's no need to worry if you're not a technical genius. We've made sure Home Connect is simple and straightforward to set up. If you do need a helping hand, you can call our Customer Service team on: **0344 892 8979** to speak to a dedicated Home Connect operator. You'll find the Home Connect app just as easy to use. There are lots of pre-set options to get you started quickly, and everything is set out logically and clearly.

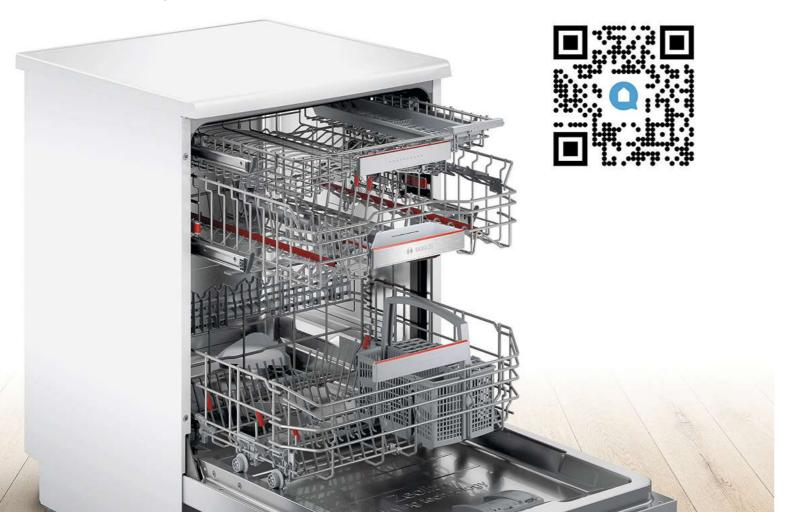

Relax - we're invented for life.

Home Connect uses the same security protocol as online banking, so you can enjoy extra peace of mind when you're using your Bosch appliances. Our app has TUV Trusted App certification, and all of our Home Connect appliances are Wi-Fi certified by the Wi-Fi Alliance.

Setting up your home appliance and adjusting the product to suit your needs is easier with the Home Connect app.

Favourites

Meal planning has never been easier. Browse the Home Connect Recipe Book from your favourite armchair. When you've made your choice, simply send all the settings from the app directly to your oven, so it's ready to go when you are.

The range of recipes are all tried and tested by Bosch Home Economists around the world, so you'll find exciting new flavours alongside old family favourites.

Tablet top up

Smart reordering of dishwasher tablets can be used via the Amazon Alexa app. To use smart reorder via the Alexa app, start by enabling the Home Connect dishwasher skill.

Automatic replenishment and being reminded via mail is already supported, voice support will follow soon. (date TBC)

Easy Start

Your i-DOS washing machine uses the water hardness and fill level to determine how much detergent and fabric softener is required to get a perfectly clean result.

And so that you never run out of detergent, the Home Connect app sends you a timely reminder when your detergent is running low.

Remote Delayed start*

Adjust the settings on your appliance from any room in your house, or even when you're out and about. So, if you're delayed while you're out? That's fine. You can simply adjust the settings from wherever you are and, if the food has already started cooking, you can simply press "pause". The oven will lower the temperature until you start it again, so your meal isn't ruined. Different levels of Remote Delayed Start allow you different levels of flexibility.

Cooking functions explained.

4D Hotair

Place your food on any of the four shelf levels to achieve consistently perfect results: thanks to the fan wheel that changes the direction of rotation during operation to distribute heat evenly on every level.

3D Hotair

By maintaining the right temperature across three shelf levels, consistently even cooking results are achieved.

Top and bottom heat

Conventional baking and roasting on one level.

Top/Bottom heat gentle

Conventional baking and roasting on one level using residual heat, allowing you to gently cook meat, fish and baked items.

By operating alternatively, the grill and fan create a rotisserie effect, perfect for creating crisp meat.

Only the bottom element is heated - ideal for pastry cases, bain-marie cooking and reheating.

Create authentic pizzas with crisp bases and moist toppings. Also great for quiches, tarts and frozen foods.

Use the centre grill for smaller quantities and more efficiency

Hotair Gentle For all those times you cook using just one shelf level,

Hotair Gentle gives perfect results.

Full width variable grill Grill large quantities with ease thanks to the precise temperature control. For added efficiency the door can be closed and the smells are kept in the oven.

Gently defrosts food evenly and quicker than it would take on

For those times when you need your food ready more quickly, select fast heat to warm the oven faster.

Single point probe

The single point meat probe constantly measures the temperature at the core of the roast and as soon as the desired temperature is reached gives an acoustic and switches off automatically. (Available in selected Serie 6 models only

Perfect Roast Meat probe

Three highly sensitive measuring points determine the core temperature of your food to the exact degree, guaranteeing perfect roasting results and taking away the guesswork.

Added Steam

Produces succulent roasts, with juicy meats and crispy skins, as well as breads with the perfect colour and crust.

Pyrolytic cleaning

Heats the oven to around 480°C, which reduces dirt and grease deposits to dust that can be easily wiped away.

EcoClean Direct

Almost no cleaning is necessary thanks to a special coating of the rear wall that automatically absorbs grime.

Serie 8 ovens

With their impressive technology, elegant design and crystal clear TFT-touch display, our **Serie 8** ovens meet every need and more in the kitchen. The innovative control wheel provides convenience and functionality with full control over your dishes at all times. Plus, thanks to sensor-controlled programmes, you'll achieve perfect results every time.

Home Connect.

(selected models only)

Allows you to stay on top of your game by giving you easy access to a wide variety of innovative cooking and meal preparation techniques - all from the comfort of your mobile device.

Even heat. Maximum flexibility.

Thanks to **4D Hotair**, you can place your food on any of the four shelf levels and the results will be consistent. Our motor and fan wheel design makes it possible: it changes the direction of rotation during operation to distribute heat evenly on every level. And that's not all: with 4D Hotair, you can also bake and roast on up to four different levels simultaneously. So you'll enjoy reliable results from top to bottom.

Added steam.

By adding precisely the right amount of steam at precisely the right moment, baking results get even better. **Steam** prevents food drying out, giving bread a deliciously crispy crust and a light, fluffy inside. Steam is also great for bringing out flavours, when roasting or re-heating. Simply fill the water tank, integrated behind the semi-automatic control panel in the Serie 8 ovens. The added steam function is controlled automatically.

(selected models only)

Perfect results at your fingertips.

Discover our sensor-controlled functions with BoschAssist, PerfectBake and **PerfectRoast**. This feature automatically sets precise information on temperatures and cooking times for all kinds of dishes, plus you can simply scroll through to find our intuitive baking and roasting functions.

Scroll through for the PerfectRoast.

Traditional British beef, Easter lamb or Sunday roast chicken - with the **PerfectRoast meat probe**, perfect results are guaranteed every time. With three temperature sensors for even more accuracy, the meat probe measures the core temperature of the food – removing the guesswork. Just like a professional chef, but with complete ease. Three highly sensitive measuring points determine the core temperature of your food to the exact degree, guaranteeing perfect roasting results and taking away the guesswork.

Scroll through for the PerfectBake.

Baking has never been easier. The PerfectBake **sensor** offers precise sensitivity and constantly measures the moisture level of dishes, as well as automatically regulating the baking process.

OOO Pyrolytic Cleaning.

Cleaning the oven by hand can be very exhausting and time-consuming. Thanks to our ovens with the Pyrolytic self-cleaning function, you can now save yourself this task for good, without getting your hands dirty or using any chemical cleaning products. Just remove the trays and rails, select the level of soiling, press 'Start' and your oven will heat up to around 480°C, reducing any grease/food residues to dust. All that's left for you to do is wipe away the dust with a damp cloth.

Serie 6 ovens

Simple elegance meets superior technology. Serie 6 ovens give you more than just convenient operation and superb energy efficiency. Modern functionality means your oven is easy to use with various programmes to suit different foods, all available to view clearly on the large LCD display.

3D Hotair

3D Hotair allows cooking on up to 3 shelves at any one time. The fan at the back of the oven distributes the heat from the ring heating element, creating consistent temperatures around the cooking cavity ensuring even temperatures.

· Hotair cooks at lower temperatures, so this cuts down soiling of grease and fat.

Single Point Meat Probe

The single point meat probe constantly measures the temperature at the core of the roast and as soon as the desired temperature is reached gives an acoustic and switches off automatically. No monitoring is needed to get the perfect roast. No over cooking or drying out.

- · Suitable for leaner meat
- Connects to the oven internally via a plug-in jack
- Wide core temperature range: 30-99 °C
- · User manual offers core temperature guidance for cooking results
- Suitable for using with **3D Hotair**, grilling and

 For linerter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output its reduced in stages over the first few minutes down to the next power level (600W).

After a cooling period, the microwave boost option will be available once more.

Ovens with integral microwave — When teamed with a single oven, Bosch compact ovens with microwave offer a great alternative to a double oven if you require more space for traditional cooking. Designed first and foremost to function as an oven, with construction, features and functions identical to a traditional single oven, these models benefit from the addition of microwaves at low medium power (max 360W) to deliver oven-led combination cooking, which speeds up the cooking process while retaining traditional cooking results.

Microwave Combination Ovens — These models are designed to provide more functionality than a solo microwave oven, focussing on combination cooking, with the microwave using higher power (max. 600W) to lead the cooking process, supported by Hotair or grill functions to deliver speedy crisp and browned results. Based around a more traditional microwave meterical toulion if refects olution if reflect solution if regular microwave heating is the priority, but with the back-up of separate or combination Hotair cooking and grill functionality if required. These models are designed to operate best in combination mode, so when heating using microwave only, it may be necessary to adjust cooking times.

¹ For further information on inverter technology, please go to https://media3.bosch-home.com/Documents/MCDOC03402966_BOSCH_microwave_details_19.pdf ² For Inverter models, the maximum setting offers a time limited boost option for heating liquids. To ensure optimal results and to protect the appliance, the microwave power output is reduced in stages over the first few minutes down to the next power level (600W). After a cooling period, the microwave boost option will be available once more.

Introducing the Bosch electric hob range.

As you would expect from Bosch, all our electric hobs are made using high quality materials, are easy to use and add contemporary elegance to any kitchen.

To help you choose the right electric hob for your home we have divided them into the three ranges below.

Serie 8

Our **Serie 8** range of electric hobs combines convenience and elegant design, allowing you to select individual cooking zones and power levels. All controlled at just the touch of a button with the modern touch control, TFT or DirectSelect Premium control.

Serie 6

Expect excellent operation and timeless designs with our Serie 6 range of hobs. You'll get premium engineering and materials, so that you can always cook something a little bit special. Get ultimate control with the easy to use DirectSelect touch control.

Serie 4

Featuring a range of **Serie 4** electric hobs that are convenient and simple to operate, our essential range maintains classic design with contemporary style.

Model shown: PXY875KW1E

Whichever model you choose from our Serie ranges, you'll find lots of reasons to love your Bosch electric hob.

Faster cooking, reduced energy consumption.

Induction hobs generate heat only where it is needed - in the base of the pan. What does this mean for you? More safety and convenience. The lower temperature keeps both big and little hands safe from burning. Not only that, but an induction hob brings water to a boil much faster than a glass-ceramic hob, which also saves a great deal of energy.

Express cooking.

Induction cooking with a turbo boost. The **Boost function** allows you to increase the power of the cooking zone by up to 50% - perfect for large pots and pans or when you're in a hurry.

Easy to clean.

Automatic pan recognition only heats up the base of the pan and not the rest of the zone, which doesn't waste energy and leaves the rest of the hob cool to touch. Keeping the hob cooler makes it safer and also prevents spillages from burning on so it's easy to clean.

Clean up in an instant.

Model shown: PXV851FC1E

Cooking that's designed around you.

Even more flexibility.

Available on selected **Serie 8** FlexInduction hobs, the **Extended FlexInduction zone** offers optimum flexibility. The amount of usable surface on the hob is maximised to accommodate even the largest of cookware. With **CombiZone**, two cooking zones can be linked, making the switch from small to large pans effortless. Plus, the **MoveMode function** automatically switches from boil to simmer with a simple slide of the saucepan.

TFT Display.

Clear text and pictures allow simple operation of the integrated touch display.

More control at your fingertips.

Set the correct temperature with a single touch thanks to **DirectSelect**.

No more scrolling up or down, just simply press one button to select the right heat level. Models with **DirectSelect Premium** touch controls feature an additional minimum temperature setting giving you added cooking control.

Cooking with induction is not just quick, safe and

Cooking with induction is safer than all other alternatives. As only the base of the pan is heated and not the entire hob, this will be warm to touch but should not burn.

There is also a **child safety** feature: the built-in lock

Perfect results every time.

PerfectCook

May your pasta never boil over again. Our hobs are designed with a sensor so you'll be able to control your cooking by the temperature in the pan rather than the power level. So whether you're defrosting, warming up, cooking or deep fat frying, you're in control with our smart **CookingSensor**, because precise temperature control guarantees perfect cooking results.

У PerfectFry

Enjoy perfectly cooked steak, however you like it. Our clever **FryingSensor** measures the temperature in the pan for perfect results. So when you're reducing a sauce, the heat will be low and gentle, and when you want a high heat for frying a steak, you'll have precisely the right temperature. Say goodbye to overcooking and undercooking your favourite meals.

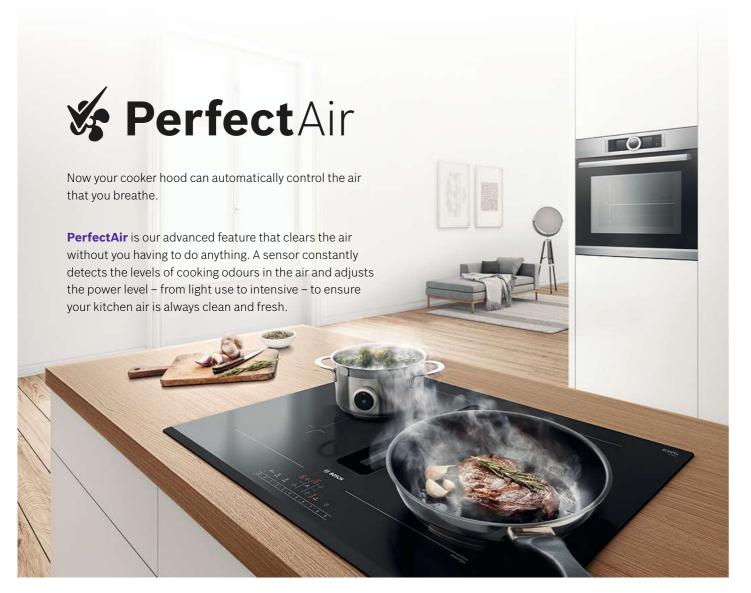

Venting hobs

The Perfect combination.

To allow you more freedom and flexibility in designing your kitchen, we've developed hobs with an integrated ventilation module. These hobs combine the latest technologies of our induction hobs and cooker hoods in a single appliance. The integrated ventilation module extracts steam and odours at their source.

The Serie 8 PerfectAir venting hob removes odours from the source, leading to fewer cooking smells in the kitchen. It can be easily installed into the work surface to suit any kitchen design and has the added convenience of being easy to clean. Thanks to the **PerfectFry** sensor and **PerfectCook** sensor on the hob, you can achieve perfect results whether you're frying or boiling.

For more information on types of installation for Venting Hobs, please see pages 116 & 117.

Venting hobs

Introducing the Bosch gas hob range.

Welcome to intuitive cooking. The advanced technology built into our hobs makes cooking on gas simple and precise. Understanding how you cook means we've been able to design a FlameSelect feature that lets you fry, stew, steam and boil with confidence - without constantly checking the flame.

Serie 8

Our Serie 8 range of gas hobs combines convenience and truly elegant design with ultimate cooking control, meaning a truly professional performance in the kitchen.

Serie 6

Expect excellent operation and timeless designs with our Serie 6 range of hobs. You'll get premium engineering and materials so that you can always cook something a little bit special.

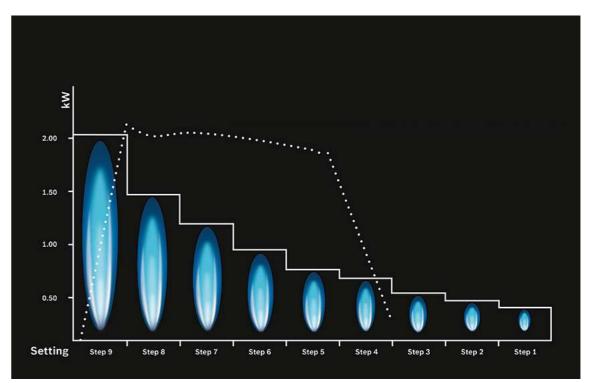

Serie 4

Featuring a range of gas hobs that are convenient and simple to operate, our **Serie 4** range maintains classic design and style.

(Flame Select

Gas without the guesswork.

The gas cooktops with FlameSelect are equipped with nine precisely defined power levels which let you adjust the required heat easily and reliably. For simply perfect cooking results.

Standard gas hob valve power output.

..........

FlameSelect valve power output.

We're taking the guesswork out of using a gas hob. Our innovative StepValve technology regulates the gas output precisely, so you're able to choose the size of flame. With an easy-to-use setting, all you need to do is decide which of the 9 power settings you want. At last, FlameSelect gives you the confidence to cook on gas without leaning down to check it.

Design match

If you want a selection of cooking options within your kitchen, this can be realised with a combination of our worktop cooking appliances. You can select everything from our great range of Induction, Ceramic or Gas hobs and then combine with one our range of Induction, Ceramic or Gas Domino hobs.

Gas Domino Hobs.

Induction Domino Hob.

Ceramic Domino Hob.

PIE651BB1E

PKF375FP1E

These hob appliances can be arranged side-by-side to create a larger cooking surface area, or positioned on their own to create a separate cooking space. Ideal for smaller kitchens that do not have the space for large hobs.

TIP: Ensure your extractor hood is the same width as the worktop appliance you choose.

PRB3A6D70

A touch of the Orient.

Powerful, dual ring wok burners are perfect for oriental cooking. They deliver a boost both in power and speed, but can also be used very effectively at lower settings when required.

Smart design

Square design pan supports don't just look good, but provide more stability for pots and pans. Cleverly designed to fit together, they are separate pieces, which make them easy to handle and clean. The elegant tempered glass base allows for a choice of surface mounting for quick and easy installation, or flush mounting.

Introducing the Bosch hood range.

Offering a blend of function and form, Bosch hoods deliver quiet, effective extraction that makes the kitchen and home a more pleasant environment. Make a bold design statement or complement a more minimalist look.

To help you choose the right hood, we have divided them into four ranges.

Serie 8

With our **Serie 8** range of hoods experience automatic extraction rate control with **PerfectAir** sensor technology. Our hoods offer high quality craftsmanship combined with cuttingedge technologies to make the kitchen a more pleasant environment.

Serie 6

Ultimate convenience and tasteful design make cooker hoods within our **Serie 6** range an asset to any stylish kitchen. Electronic controls give you ease of use. Experience maximum operating convenience with **DirectSelect** touch controls from Bosch.

Serie 4

life, the kitchen needs to have a comfortable atmosphere free of cooking steam and disruptive noise.

Our **Serie 4** range of cooker hoods are extremely quiet, easy to operate and impressive

with their modern design

As the centre of family

Serie 2

With our **Serie 2** range of hoods, you can be assured of high quality design and features that make your life easier in the kitchen, such as easy-to-use controls and dishwasher proof metal grease filters for greater convenience.

Hood functions explained.

(Check model for avalaible functions.)

PerfectAir

A sensor constantly detects the levels of odours in the air and adjusts the power level – from light use to intensive – to ensure your kitchen air is always clean and fresh.

Hob Hood Control

Control your hood via your hob with Hob Hood Control on selected Bosch hobs.

CleanAir Plus Filters

CleanAir Plus recirculation filters for maximum air purity at minimum volume. These filters can increase the odour absorption of the cooker hood by more than 90%* and remove 99% of pollen** in the air at the same time.

*ISO 16890-2 and-4

**Ambrosia-Pollen following test procedure ISO/TS 11155-1

EcoSilence Drive

Our EcoSilence Drive brushless friction-free motor is durable and designed to last longer. The motor is highly efficient and offers exceptional performance while saving you energy.

TouchControl

Set the exact power level with a single touch thanks to TouchControl. It's easy to operate: simply select the right power level or turn on the lights and away you go.

Silence

Your guests are not alone in appreciating a relaxed cook. So you can chat with your guests while cooking.

Easy mounting

Easy to install appliances give you another reason to choose a Bosch Hood.

Filter Saturation Indicators

Out of sight, out of mind: When it comes to the filters in our hoods we often forget to check if they need to be changed. With Home Connect you can now check the state of your hood's filters, and receive valuable maintenance information. Simply log onto the app* to check the carbon and grease saturation of your filters and whether a replacement is necessary.

*Selected models only

Whichever model you choose from our range, you'll find lots of reasons to love your Bosch hood.

Why shout when you can whisper?

Our ventilation solutions go through advanced sound frequency testing to make them as quiet as possible. Our brushless **EcoSilence Drive™** motors also help to keep sound levels low while delivering powerful performance*. If this wasn't enough the **PerfectAir Sensor** can automatically adjust the power level and sound level along with it, to the optimum point for performance and a pleasurable cooking experience**.

*Sound power measured according to EN60704-3 on largest pipe diameter.
**Noise level (sound power) based on dB(A) re 1 pW

EcoSilence Drive™

Our hood ranges incorporate energy efficient lighting that can be adjusted for bright illumination to work under, or lower illumination for ambient mood lighting in the kitchen thanks to the dimmer function. In this light, even your electricity bill looks good. Our **EcoSilence Drive™** brushless friction-free motor and energy saving LED lights reduce energy consumption by up to 80% compared to a similar five-year-old model, without compromising results.

Control your hood via your hob with Hob-Hood Control on selected Bosch hoods. The hob and hood connect directly over WiFi and as soon as your hob is turned on, your hood lights will come on and it will start extracting.

Pair this feature with the **PerfectAir Sensor** in automatic mode to create a fully automated ventilation solution. This then optimises extraction and noise levels with the sensor adjusting the power level based on the steam and odours from the cooking surface.

If you want to control the hood directly, just activate manual mode on the hob controls with the touch of a finger. In addition to the extraction rate, you can also control the lights of the hood via the hob.

Making life easy through innovative technologies

Wall-mounted

Wall-mounted cooker hoods are generally mounted above the hob, on the wall between the wall units. This type of cooker hood fits beautifully into the line of your kitchen units whilst providing effective ventilation that you'll barely see - but you'll notice the amazing effect. These feature the Bosch lifeclip which can be matched with other Bosch appliances in your kitchen.

Box Chimney

Chimney hoods in a box design perfectly complement your hob installation.

Glass Chimney

Curved and flat chimney hoods are great for a traditional and stylish kitchen.

Pyramid Chimney

Pyramid hoods impress with classic lines and also the refined contours of the contemporary Slim Pyramid designs.

Flat Slimline

This slim design is perfect for keeping an eye on your pots and pans with a stylish control wheel that matches with Bosch Serie 8 ovens.

Angled Glass

The angled design doesn't restrict headroom so you can keep an eye on your cooking with ease.

Ceiling

A flush fit ceiling cooker hood is normally installed into a false ceiling. It not only ensures clean air, it also provides excellent lighting for your hob and creates more space in island kitchen cabinets.

Island Chimney

Our Island cooker hoods have been specially developed for use over your kitchen island and are freely suspended from the ceiling above it. Thanks to the wide choice of classic designs and different sizes, island cooker hoods offer the ideal solution for every kitchen and every requirement.

Our chimney hoods use a box design to perfectly complement your island

Worktop

DownDraft

The DownDraft hood is concealed inside your worktop, next to your existing induction hob. It rises up smoothly when needed and includes powerful LED lights to illuminate your cooking.

Integrated

Canopy

Bosch canopy cooker hoods are powerful ventilation systems that can be integrated into the cabinets above your hob. The hood provides excellent extraction of steam and cooking smells, as well as providing additional lighting for your cooking surfaces.

Telescopic

Telescopic cooker hoods are installed into a wall unit. To operate them, the flat section is pulled out, enlarging the extraction surface. Selected models have easy installation systems and accessories are available, as well as a lowering frame to make the hood invisible when not in use.

Integrated

Integrated cooker hoods have a furniture panel mounted to them installing seamlessly into the kitchen. For use this front panel is pulled forward at an angle, only then making the hood visible.

Built Under

Great performance in a tiny space. Our built-under extractors are housed underneath the kitchen unit and can always be seen

Ducted or recirculation mode?

Ducted extraction

Ducting out is the most effective method of extraction if the hood can be sited on an outside wall, or an outside wall can be reached via ducting. The main difference between ducted and recirculation cooker hoods is that ducted systems can extract steam and odours, as well as grease. All our extractors are now standardised to a 150mm diameter outlet for easier installation. Use of 120/125mm diameter ducting is also possible, but will result in reduced air flow and increased noise. Use of 100mm diameter ducting is not recommended.

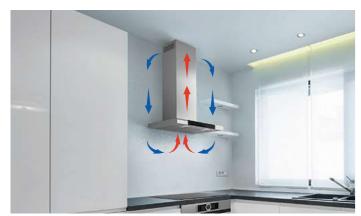

The following points should be observed for optimum ducted extraction results:

- 1. Ensure any pipe elbow bends are at least 30cm from the hood ducting opening.
- 2. Avoid reducing the diameter or area of the ducting.
- 3. Use wide-angled pipe elbows, but keep the number used to a minimum.
- 4. Only install pipes with smooth, even inner surfaces. If a flexible hose has to be used, ensure it is pulled tight to smooth out the ridges before fixing.
- 5. Avoid reducing the diameter or area of the ducting.
- 6. Use ducting pipes with a diameter of at least 120mm, but ideally 150mm.
- 7. Keep piping to a minimum use the most direct route to external outlet.
- 8. Make sure that there is an adequate supply of fresh air to replace the air ducted out of the kitchen i.e. windows that can be opened, doors to adjacent rooms, air bricks.

Recirculation kit

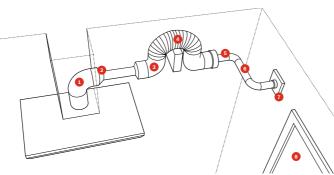

Cooker hoods with recirculation are energy-efficient and much easier to install. Air is passed through the metal filter to extract the grease and then through a special charcoal filter, which removes odours and in high perfomance **CleanAir Plus filters** also removes over 99% of pollen*. The purified air is then returned to the room. As no ducting openings are necessary, this is an energy-efficient method of extraction as no energy can escape (i.e. cool air in the summer or warm air in the winter), making it a good choice for low energy houses. The kit contains all you need to set the hood up for recirculation and installation is relatively easy. Check each model for details on the appropriate recirculation kit accessory.

Problems with installation may occur if points 1 to 8 are not observed.

Tips and hints

- 1. Calculate the extraction capacity needed.
- 2. Choose a hood with at least the same width of your hob.
- 3. Ensure efficient pipe ducting installation.
- 4. As a guide the hood should be installed at a minimum of 65cm above a gas hob or 55cm above an electric hob.
- 5. To effectively remove cooking odours from your kitchen, switch the hood on 5-10 minutes prior to cooking.
- 6. Leave the hood to run at a low setting after cooking has finished for 5-10 minutes to remove any lingering odours. Or simply select the Automatic After Running function, which enables the hood to continue running at a low speed for 10 minutes before automatically turning itself off (available on selected models).
- Regularly clean metal grease filters to ensure optimum extraction performance. All of our metal grease filters, brushed steel filters and rim ventilation filters are dishwasher-proof.
- 8. Choosing the correct extractor. As a guideline, the air in the room should be changed 6-12 times per hour. Calculate the floor area in square metres and multiply by the height of the room in metres. Then divide the maximum extraction rate of your chosen hood by the figure calculated above. The resulting figure should be at least 7, but preferably as close to 12 as possible.

Example

Kitchen (H x W x D) metres 2.1 x 4.5 x 4.2 = 39.7m³.

Assume a maximum of 12 air changes per hour – multiply 39.7m³ by 12 = 476m³/h. Choose a hood capable of extracting at least this amount of air per hour – e.g. DWB96DM50B (max ducted extraction rate intensive 580m³ per hour).

A breath of fresh air in hood design. Now your cooker hood can automatically control the air in your kitchen. Intuitive sensor technology from Bosch makes cooking easier than ever. **Perfect** Air When you're busy cooking, the last thing you need to think about is adjusting your hood to clear any steam in the kitchen. The **PerfectAir** sensor continually detects the level of odours in the air during the cooking process and automatically adjusts the power level to ensure optimum extraction performance. So there is no longer any need to manually adjust the power levels. This means that you can concentrate on your cooking rather than worrying about whether your hood is on the right setting. DRR16AQ20

The Plug&Play ceiling ventilation: for a simple and space-saving solution, with perfect installation in open plan kitchens. Designed for easy installation to the ceiling and saves space in island kitchen cabinets.

Hob Hood Control: now you never need to touch the hood again. The fan speed or lights of the hood can be conveniently controlled directly from the hob (with selected Wi-Fi enabled hobs).

This recirculation hood comes with high performance CleanAir Plus filters. These have an anti-fish coating and remove over 99% of all pollen. The metal grease filters filter grease and other solid particles out of the extracted air. To keep these filters operating at maximum efficiency, clean them about once a month either by hand or in the dishwasher.

Power automatically reverts back to normal setting after intensive.

Air Flow and noise declarations made in line with CECED Code of Conduct.

Measured according to EN61591 on largest pipe diameter.

Sound power measured according to EN60704-3 on largest pipe diameter.

From top of pan supports.

A type of recirculating kit is required if recirculating. Depending on the model, a 'Recirculating odour filter kit' will consist of the following items: Charcoal filter, flexible hose, air duct, fixing components, installation instructions.

Canopy hoods

Serie 6

DHL785CGB

Bosch canopy cooker hoods are powerful ventilation systems that can be integrated into the cabinets above your hob. The hood provides excellent extraction of steam and cooking smells, as well as providing additional lighting for your cooking surfaces.

Effortlessly efficient, load after load.

Our built-in laundry appliances are designed to perform perfectly, load after load. And our advanced technology means your clothes are cleaned effectively and efficiently.

Serie 8

Perfection in every detail, our **Serie 8** range of laundry appliances stand out from the crowd with superior quality, results and first-class design. Clever features such as the TimeLight take away the guesswork on the progress of the wash. Unique innovations combined with energy efficiency deliver

Serie 6

Our Serie 6 range of laundry appliances offer a broad choice of specialist programmes and deliver high performance and effortless convenience to enhance your lifestyle.

Serie 4

Models within our Serie 4 range combine practical features and Bosch build quality in a consistent, value for money package.

Laundry functions explained.

TimeLight

outstanding performance.

The time remaining on your cycle is projected onto the floor. You can also view the programme progress status.

Select the programme for your wash and the droplet-shaped drum structure and asymmetrical paddles will adjust the drum movements to powerful or gentle.

EcoSilence Drive

Our washing machines with EcoSilence Drive generate lower noise levels for quieter living.

Aqua Stop

This security gives you peace of mind that the water will stop in the unlikely event of a leak.

Simply pause the cycle and the machine will automatically adjust the water. This allows you to add or remove items of any size to your wash.

Time Delay

Have your laundry ready when you need it. Just delay the start of your programme with one simple button.

AntiVibration Design

A spiral design on the side of the washing machine that increases stability and reduces vibration. This makes for a quieter machine with improved sound dampening.

Our built-in washing machines have a drum capacity of up to 8kg, perfect for those busy households.

Washing machines

Never miss an item again. Reload by Bosch.

For dropped socks, mistaken items with your whites or forgotten clothes, Reload function on Bosch washing machines allows you to add or remove clothing of any size to your washes. Simply pause the cycle and the machine will automatically adjust the water level to allow you to open the door. Reload your items and restart the wash.

TimeLight.

Bosch washing machines are so quiet sometimes it's hard to tell whether they are on or off, especially on fully-integrated models where there is no visible control panel. The TimeLight indicates the programme status and time remaining onto any floor surface.

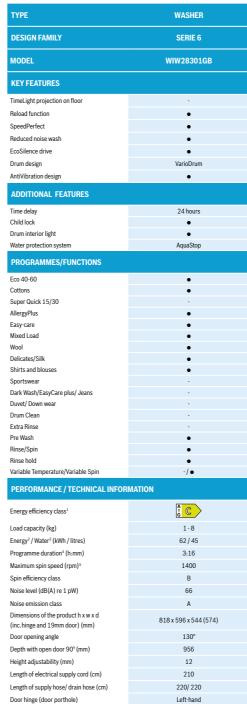

Washing machines

Ideal for families.

Ideal for families and busy households, the large 8kg capacity means you can wash more laundry in one go. A typical 8kg load could be made of king size bed linen, including 4 pillow cases. So whether you have lots of laundry, or fewer loads but with larger amounts, large capacity will make your laundry life easier.

Making **life easy** through innovative technologies

Introducing the Bosch dishwasher range.

All our built-in dishwashers offer a range of advanced technologies as standard and additional options across the range to suit your individual requirements.

To help you choose the right Bosch dishwasher, we have divided them into the four ranges below.

Serie 8

Our Serie 8 range combines cutting-edge design and advanced technology, including Home Connect. The PerfectDry function absorbs moisture before releasing it as hot air for energy-efficient drying. Exceptionally quiet, offering additional storage and flexible loading solutions our Serie 8 dishwasher is a perfect solution for busy households

Serie 6

Our Serie 6 range comes packed with technology, from energy and watersaving modes to quick washes for when time is at a premium. They also feature our clever PerfectDry technology and handy features such as Max Flex baskets, Extra Space 3rd Basket, Extra Clean Zone and **EfficientDry**

BOSCH (Sco Auto Intensive Express Express Express Express

Serie 4

Our Serie 4 range of models offer great value for money but does not compromise on Bosch build quality. They combine advanced energy and resource saving features. In addition, they offer Flex baskets and Max Flex baskets with foldable racks in the top and bottom baskets.

Serie 2

Our Serie 2 dishwashers offer you the classic design with easy operation. They are the optimal solution for anyone who wants a reliable appliance with good value for money. Now all Bosch dishwashers come with Home Connect as standard.

The dish dryer among dishwashers.

A clever function that dries everything to perfection. And we do mean everything – plates, pans, glasses and all plastic items. Everything will be completely clean and perfectly dry, so you'll never have to pick up a tea towel to finish the job again.

The technology behind **PerfectDry** unique to Bosch, is called **Zeolith®**. It is a process applied to every cycle that uses naturally occurring minerals, that heat up when they come

into contact with water. Clever **Zeolith®** beads transform humidity into warm air that speeds up the drying process. The warm air is then distributed evenly over the load.

So when you need a wash with brilliant drying results, it's time to choose Bosch.

SST ExtraDry

Want your dishes extra dry? No problem. This function gives you even more drying power when you need it. Just choose the **ExtraDry** option and more heat will be created to extend your load's drying cycle.

EfficientDry

Automatically opens your dishwasher door, offering better drying results compared to a closed door (after 30 minutes). Select this feature via the Home Connect app, available on all programmes except pre-rinse and machine care.

VarioHinge.

VarioHinge.

The innovative Vario Hinge system is the optimal solution for challenging built-in dishwashers. In kitchens with a low plinth (<90mm) and extra long furniture fronts the door and appliances might collide into each other. With VarioHinge, the furniture front slides up so the door opens perfectly without collision. This ensures perfect design of a fully integrated kitchen. VarioHinge is available in Serie 4, in two heights 81.5cm and 86.5cm.

ExtraClean Zone.

Extra thorough cleaning for heavily soiled items in the upper basket. This intensive zone doesn't need higher temperatures, it uses 3 jets to clean those stubborn items. So no more pre-soaking before going into the dishwasher!

Glassware support with smooth gliding baskets.

New anti-slip elements and stemware support within the upper basket will give extra protection to all glassware. Baskets will glide effortlessly along the internal brackets, thanks to our new pull out

Dishwasher functions explained.

(Check model for available functions)

TimeLight

Bosch dishwashers are so quiet sometimes it's hard to tell whether they are on or off, especially on fullyintegrated models where there is no visible control panel. The TimeLight indicates the programme status and time remaining onto any floor surface.

InfoLight

Coloured light beam projects onto the floor when the machine cycle is started, and turns off when finished.

EmotionLight

ights up the dishwasher cavity with 2 white LED lights.

SpeedPerfect+

Our SpeedPerfect+ option reduces programme times without compromising on quality. So you still get hygienically clean and dry dishes but the duration of the cycle* is reduced by up to 50% - ideal for busy households and entertaining. *Except: Prewash, 1 hour and Quick 45° programme.

Place Settings

A selection of our dishwashers will hold up to 14 place settings in one load - perfect for larger households.

Home Connect

Different dishes and glassware need to be washed in different ways. With the Bosch Home Connect app, simply tell your dishwasher what's in the load and it'll work out the perfect programme. Now available on all dishwashers.

Door Open Assist

With OpenAssist you can open fully integrated dishwashers by simply touching the front of the unit. This partially opens the door, making it easy to load and unload the dishwasher. The handle-free dishwasher door is the optimal choice for modern designer kitchens with matching-style unit fronts. Activate the electronic child lock for the door to make this a double push to open.

Self-cleaning filters

Self cleaning filter system, with spray arms designed to direct water at the filters on every rotation. Please note, self cleaning references are to reduce chances of filters being blocked during the cycle, regular maintenance of clearing and cleaning filters

Dosage Assist

Get the most out of your detergent with Dosage Assist; a small area at the front of the top basket that catches the tablet when it's released during the cycle. It controls how the tablet is dissolved for optimum performance.

EfficientDry

Automatically opens your dishwasher door, offering better drying results compared to a closed door (after 30 minutes). Select this feature via the Home Connect app, available on all programmes except pre-rinse and machine care.

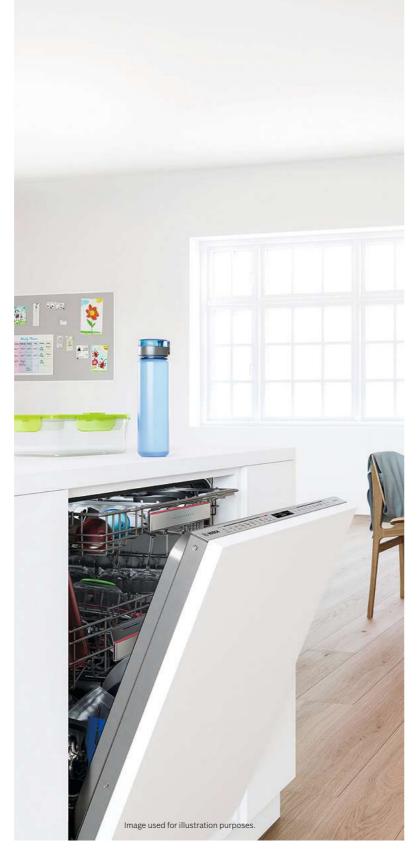

Save water with every load and only use the right amount of water needed for each load.

Silence on demand

Up to 30 min noise reduction at any time via the Home Connect App.

Speed on demand

Have your load ready even guicker at any time via the Home Connect App.

10 year anti-rust warranty

Our appliances are made from top quality materials and in addition to our standard appliance warranty, we provide a free of charge warranty against rusting-through of the dishwasher's inner cavity.

Machine care

Your dishwasher will help look after itself with this smart function. Optimising the water and energy consumption, it works on a short run time of 80-90 minutes at high temperatures. It eliminates limescale and grease deposits inside the dishwasher and works with a standard machine-care detergent. On selected Serie 8 and Serie 6 models, it will even remind you to run the programme every 30 cycles.

Helping to make your life quiet and more efficient.

Whisper quiet washing.

Bosch dishwashers are amongst the quietest. With revolutionary EcoSilence **Drive**[™] there are dishwashers in the range which operate at 42 decibels. With the Silence programme selected, the noise is reduced even further.

Introducing the Bosch refrigeration range.

Save more, waste less. Our range of built-in fridge freezers are packed with innovative technology to keep your food fresh for longer, so you'll throw out less and save on your weekly shopping bill.

To help you choose the right appliance, we have divided them into the four ranges below.

Serie 8

Cutting-edge design meets advanced technologies. All models in our Serie 8 range are packed with features that save valuable time, effort and money perfect for modern, busy households.

Serie 4

All models in our Serie 4 range combine practical features with Bosch build quality.

Serie 6

Our Serie 6 range of appliances combines efficient performance with convenient storage and superior food preservation.

Serie 2

Built for optimal food storage, the Serie 2 refrigeration range is just as practical as it is value

Selecting the Right Refrigeration for You

Built-in fridge freezer

Built-in fridge freezers blend seamlessly into your kitchen cabinets, making it easy to access your chilled food, and still provide plenty of storage for your frozen goods. Select from a variety of options to suit your needs for either larger fridges or freezers.

Built-in fridge

Built-in fridges integrated into your kitchen cabinets. Add to the expanded space you have for keeping your chilled food fresh.

Built-in freezer

Bosch has a wide range of built-in freezers to suit every kitchen size. From tall upright freezers to compact under counter models, all Bosch freezers are built to maximise storage space and minimise energy consumption.

Built-under fridge and freezer

Our built-under fridges and freezers are ideal for those limited on space within the kitchen. Under-counter cooling solutions will allow you to have easy access to your chilled food, all while being discreetly tucked behind the door.

American-style fridge freezer

American-style refrigerators are stylish and spacious, giving you copious amounts of room to store your chilled and frozen food. In addition to the premium design, some of these fridge freezers also contain impressive features such as ice and chilled water dispensers. Or, if you don't have a water connection, select our model with a built-in water tank.

Hinges to fit in with your kitchen.

Fixed hinge

Fixed hinges allow heavier furniture doors to be fitted to the appliance, ideal for kitchen cabinets made from heavier hard wood. This also allows the door to be open at a wider angle, making the whole fridge cavity easily accessible.

Sliding hinge

Sliding hinges are designed for integrated kitchens and are designed to sit between the appliance and the kitchen furniture, which is secured by a number of brackets. As you open the furniture door, the appliance door also opens, thanks to the series of brackets.

Quietly does it

As there could be many small and larger hands opening and shutting the fridge door, it's nice to know that we've integrated **SoftClosing doors** in many models – so doors don't get left open accidentally.

Easy-to-clean magnetic door seals

The magnetic door seals on all of our refrigeration ranges are removable, making them easy to clean and/or replace when necessary.

Whichever model you choose, you'll find a lot of reasons to love our Bosch cooling appliances.

NoFrost.

Never worry about having to defrost the freezer again. The NoFrost system prevents the build up of ice by automatically initiating the defrost operation as required. This also helps to maintain the appliance's energy efficiency.

LowFrost.

LowFrost cuts ice build up by half, meaning you have to defrost your freezer less oftencompared to approximately every three months for a static freezer - saving you energy and time.

SuperFreeze & SuperCool.

Activating the SuperFreeze function before you go shopping lowers the temperature for a short period, so anything new put into the freezer is frozen quickly. SuperCool function on your fridge performs a similar task, keeping everything at the right storage temperature.

Save time with flexible storage.

Put away the weekly shop more easily, and get what you need faster too, thanks to height adjustable shelves and fully extendable drawers. The EasyLift door shelf can be raised to make space for taller items to be stored in the door. The EasyAccess shelf can

be conveniently extended so you can more easily view the food in your fridge.

More space.

Our freezers are extra spacious meaning you will find it easy to fit everything in perfect for busy households. The extra large BigBox is big enough for large bulky

♥ VitaFresh

With VitaFresh, you'll be able to store your fruit and vegetables safely to lock in the freshness. And with an adjustable humidity setting on the drawer, you'll be keeping your fresh food in a perfectly controlled environment.

You'll also find two drawers, one for fish and one for meat, with a temperature regulating slider which lets you lower the temperature up to 4°C lower than the rest of the fridge.

The Serie 6 fridge-freezers help you to live healthier. They not only offer you plenty of room for fresh foods, drinks and even big pots and bowls, but also the technology to store them optimally.

The VitaFresh plus freshness system guarantees ideal storage conditions at any time and ensures that fish, meat, fruit and vegetables stay fresh for longer. This makes our Serie 6 fridgefreezer not only optimal for your food, but also for yourself.

VitaFresh plus models have the added benefit of a convenient push button for humidity control.

freshness system VitaFresh pro. It keeps food fresh for longer with temperatures from -1°C to +3°C while maintaining the perfect humidity level.

and humidity helps you to protect all the aromas, essential nutrients and valuable vitamins in your fresh food. Hence, it's easier than ever to maintain a healthy diet with fresh fruit and vegetables every day.

Refrigeration functions explained.

Never defrost again, thanks to perfect protection from ice formation that saves time and effort.

LowFrost

Defrost less often thanks to lower ice formation, saving work and energy.

BigBox

An extra-deep frozen food drawer makes stacking frozen foods containers or large frozen items like a large Christmas Turkey or pizza boxes easier.

MultiBox

Transparent drawer with wave bottom, ideal for the storage of fruits and vegetables.

SuperCool

Activating the SuperCooling function before you go shopping lowers the temperature for a short period, so your fresh shopping is kept at the right

SuperFreeze

The SuperFreeze function temporarily lowers the temperature in the freezer for when you have new shopping to load in, protecting both new and existing food.

Safety Glass
Strong glass shelp Strong glass shelves ensure heavier items can be stored safely.

EasyShelf Access

The shatterproof, frameless glass shelves are particularly easy to use, thanks to the smooth pull-out mechanism. And they also give you a clear view of your food at any time.

MultiAirflow

The fan-assisted MultiAirflow System causes gentle, even currents of cold air to emerge at all levels of the chilling and freezing area. Temperature fluctuations are minimised and cooling times reduced.

Lookout for the new energy efficiency class icons throughout our brochure and on our product pages.

Wine cabinets

The new range of stylish Bosch wine cabinets blend seamlessly into your kitchen, while constantly keeping your red and white wine perfectly stored and at an ideal temperature.

> VitaFreshpro

0°C - the perfect temperature.

Keeping vitamin-rich food fresh for longer.

Two compartments near 0°C and a hermetic seal create perfect storage conditions in two different humidity zones:

- Fruit & Vegetables (three humidity settings via convenient Jog Dial – fruits, vegetables or mixed load)
- Fish & Meat (low humidity)

Installation tips

Ovens, microwaves and hobs

Flexibility to choose the way you want to cook

Whether you're creating a feast for 15, steaming a healthy meal, cooking for one or popping on a frozen meal, Bosch appliances have the flexibility to do the job.

Built-in single and double ovens

The beauty of built-in ovens is that they can be housed in a variety of positions. For optimum convenience, install in standard tall cabinets at a level to suit the main users. Install single ovens alone, or together with a combination oven/microwave, built-in microwave, steam or combination steam oven. Hobs need to be bought separately.

Built-under single and double ovens

Single ovens can also be installed under the work surface, directly below the hob, or apart from it. Bosch also offers double ovens that are specifically designed for installation under the work surface. Hobs need to be bought separately.

Compact steam, combination ovens and combination microwave ovens

Compact appliances offer a range of combination or specialist functions – for example steam cooking is one of the healthiest methods of cooking available – and are ideal if space is at a premium. If you have more room, they're perfect for providing extra capacity and flexibility above or alongside a suitable built-in single oven. Build in to a standard tall or base cabinet with or without a warming drawer.

Standard built-in microwaves

Depending on the model, you can install into a tall housing, or in a wall cupboard. Wall cupboard models are available in 50cm or 60cm widths.

Hobs

Choose from gas, induction, ceramic or sealed plate. Available in six widths: 30, 60, 70, 75, 80 or 90cm.

Installation tips

Hoods

Keep air fresh and free of cooking smells

Extractor hoods are an integral part of a clean and fresh working kitchen environment. Not only do Bosch extractor hoods look good and add a professional touch to your kitchen, they also deal quietly and efficiently with the key tasks of eliminating unwanted odours and removing grease and moisture from the kitchen.

Chimney extractor hoods

Choose between wall-mounted models or an island version to create a striking focal point in the kitchen. Some models are further enhanced by glass canopies. Available in the following sizes: 60, 75, and 90cm wide.

Chimney extractor easy mounting system

Installing your new cooker hood in the kitchen is quick and straightforward with the patented easy mounting system. The self-levelling fixing rings allow you to precision adjust the horizontal position of the hood by up to a 6mm radius.

Telescopic extractor

Ideal where an unobtrusive extractor is required. Built into a wall cabinet above the hob, it can be extended when in use, and retracted when not. Use the special handle profile accessory, or if you prefer, a matching pelmet from your kitchen supplier. Available in the following sizes: 60 or 90cm wide.

Conventional extractor hoods

Ideal where space is at a premium, these 14cm tall extractors can be mounted directly to the wall or suspended beneath a reduced height wall cupboard. 60cm wide.

Integrated extractor hoods

Integrated extractor hoods are designed to be mounted between two cabinets with a matching furniture door affixed to the front.

Canopy extractor hoods

Designed to fit discreetly into the base of a wall cupboard, or specially designed furniture canopy with operation from below.

Choosing the correct extractor

As a guideline, the air in the room should be changed six to 12 times per hour. Calculate the floor area in square metres and multiply by the height of the room in metres. Then divide the maximum extraction rate of your chosen hood by the figure calculated above. The resulting figure should be at least seven, but preferably as close to 12 as possible.

Example

Kitchen (H x W x D) metres $2.1 \times 4.5 \times 4.2 = 39.7 \text{m}^3$.

Assume a maximum of 12 air changes per hour – multiply 39.7m³ by 12 = 476m³/h.

Choose a hood capable of extracting at least this amount of air per hour

- e.g. DWB96DM50B (max ducted extraction rate intensive 580m³ per hour).

To avoid excessive noise, try to select a model which meets the above requirements on an intermediate speed, rather than at the highest speed.

Recirculation filters

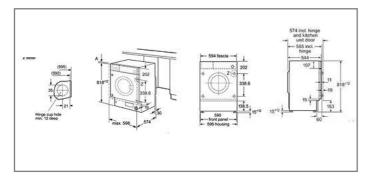

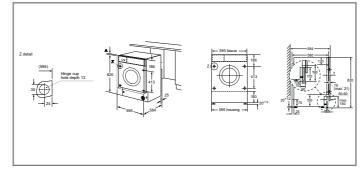

A range of recirculation filters are available depending on the model of hood and offer excellent odour reduction rates and performance benefits. The new regenerative filters can last up to 10 years and are regenerated through a heating process in the oven every four months

Installation tips

Dishwashers Integrated and semi-integrated dishwashers Energy and water-efficient with outstanding performance, Bosch integrated dishwashers quietly do all the hard work for you behind closed doors. 60cm wide Fully integrated dishwashers These models can be built under a worktop or sink drainer, between two units or at the end of a run of units. A furniture door is mounted on the appliance door so that the dishwasher is indistinguishable from other kitchen cabinets. Choose from full size 60cm wide, or slimline 45cm wide. Semi-integrated dishwashers A furniture door is mounted on the appliance door, so the dishwasher is neatly hidden behind the stylish control panel. Can be built under a worktop or sink drainer, between two units or at the end of a run of units. Available full size 60cm wide. Built-in dimensions (60m wide) If you have a recess height of 81.5 – 87.5cm, plan for an 81cm dishwasher. The appliance's feet may be screwed out to a total height of 87.5cm. Or, if you have a recess height of 86.5 – 92.5cm plan for an 86cm dishwasher. The appliance's feet screw out to a
